

CONTENTS

1.	ACCELERATOR	1
1.1	Operational Summary	1
1.2	Maintenance And Development Activities	3
1.3	Ion Source Activities	6
1.4	Beam Pulsing System	7
1.5	Development Activities	8
1.6	Accelerator Mass Spectrometry (AMS)	9
1.6.1	New Modifications in the AMS facility	9
1.6.2	²⁶ Al AMS Facility development:	10
1.6.3	Development of ultra-Clean Chemistry lab	12
1.6.4	Separation of quartz from quartzite samples around Main Central Thrust, Himalaya for <i>in situ</i> ¹⁰ Be and ²⁶ Al measurements using AMS	12
1.6.5	Separation of ¹⁰ Be and ²⁶ Al from the sediment core samples of the Kaveri delta.	13
2.	ACCELERATOR AUGMENTATION PROGRAM	15
2.1	LINAC	15
2.1.1	Activities related to Superconducting Linear Accelerator	15
2.1.1.1	The solution of the helium leaks from the coupling/beam port flanges of Niobium resonator	15

2.1.1.2	Successful test of the Piezoelectric crystal as frequency tuner of SC QWR	17
2.1.2	Superconducting Niobium Resonators	18
2.1.2.1	Resonator Production for the 2 nd & 3 rd Linac Modules	18
2.1.2.2	Reworking of QWRs	20
2.1.2.3	Spoke Resonators	21
2.1.2.4	Tesla-type Single Cell Cavity	22
2.1.2.5	Repairing of Linac-1 QWRs	24
2.2	Cryogenics	24
2.2.1	Cryogenic Facility	24
2.3	RF Electronics	32
2.3.1	Status Report of the Multi-harmonic Buncher & the High Energy Sweeper and associated jobs	32
2.3.2	Development of a piezoelectric based control scheme for superconducting resonators	33
2.4	Beam Transport System	34
2.4.1	Design of new Low Energy Ion Beam Facility	34
2.4.2	Beam Optics of High Current Injector	36
2.4.3	Measurement of the uniformity of the irradiated material due to scanning by Scanner magnet	38
2.4.4	HYRA quadrupole power supplies	39
2.4.5	High current scanner magnet power supply fabrication	40
2.4.6	Quad. & Steerer magnet power supply development for HCI facility	40

2.4.7	CAMAC based dual channel controller for scanning magnet power supply	41
2.4.8	16 bit Input gate output register fabrication	42
2.4.9	Super conducting magnet power supply and Programmer fabrication	42
2.4.10	Controlled temperature pulse generator	43
2.4.11	Development of tube based 2kW RF amplifier	43
2.4.12	Fast high voltage switch for beam pulsing at LEIBF facility	44
2.4.13	High voltage(± 2 kV) bipolar amplifier to power electrostatic scanner/ sweeper	45
2.4.14	SCR based single phase power controller	45
2.5	Low Energy Ion Beam Facility (LEIBF)	46
2.6	High Current Injector	48
2.6.1	High Temperature Superconducting ECRIS -PKDELIS and Low Energy Beam Transport System (LEBT)	48
2.6.2	Low Power RF Tests on the 1.17m Modulated Prototype RFQ Accelerator	53
2.6.3	Status report on the fabrication and testing of the prototype IUAC DTL-IH tank	55
3.	RESEARCH SUPPORT FACILITIES	59
3.1	High Vacuum Laboratory	59
3.1.1	Installation of new LEIBF Facility	59
3.1.2	Assembly and Commissioning of New Beam Diagnostic System for HCI	60

3.1.3	Installation and Commissioning of ASPIRE (Automatic Sample Positioning and Irradiation Equipment) in Radiation Biology Line	60
3.1.4	Other Installation Work	61
3.1.5	Design and Fabrication of Electronic modules and Controllers	61
3.1.6	Shifting of Phase Detector From 06 Area (before LINAC) to 05 Area (before Superbuncher)	62
3.1.7	Modification and Installation in Ion Source Test Bench	62
3.1.8	Installation of Scanner Magnets in Material Science-II	63
3.1.9	Pelletron and Beamline Related Maintenance	63
3.2	Maintenance of Magnets and Power Supplies	64
3.2.1	Routine maintenance	64
3.2.2	BTS repairing and installation works	65
3.2.3	Servicing and maintenance of power supplies besides BTS labs	65
3.3	Detector Laboratory	65
3.3.1	Large area position sensitive annular PPAC	66
3.3.2	Fast timing preamps for MWPC readout	67
3.3.3	MWPC at HYRA focal plane	68
3.3.4	Fast timing MWPC as master trigger for NAND	68
3.3.5	Silicon Strip Detector setup for HYRA focal plane	68
3.3.6	Charged particle detector array for INGA	69
3.3.7	Troubleshooting position sensitive silicon detectors in GPSC	69
3.3.8	Secondary Electron based detector for low energy heavy ions	71

3.4	Target Development Laboratory	71
3.5	Rf & Electronics Laboratory	74
3.5.1	Pulse Shape Discriminator (PSD) module for NAND array	74
3.5.2	CAMAC Substitute Crate for Control Applications	75
3.6	Electrical Group Activities	75
3.7	Computer And Communications	77
3.7.1	High Performance Computing Facility	78
3.7.2	Data Acquisition System and Hardware Development	79
3.7.3	Simulations in Materials Science	79
3.8	Air Conditioning, Water System and Cooling Equipments	80
3.9	Mechanical Workshop	82
3.10	Health Physics	89
3.10.1	Thermoluminescence of silica-based materials irradiated by thermal neutrons	90
3.10.2	Nanocrystalline $\text{Ba}_{0.97}\text{Ca}_{0.03}\text{SO}_4:\text{Eu}$ for Ion Beams Dosimetry	91
3.10.3	Thermoluminescence of $\text{BaSO}_4:\text{Eu}$ irradiated with 48MeV Li^{3+} and 150MeV Ag^{12+} ions	92
3.10.4	Nanorods of $\text{LiF}:\text{Mg,Cu,P}$ as Detectors for Mixed Field Radiations	92
3.10.5	Nanoparticles of $\text{BaSO}_4:\text{Eu}$ for heavy-dose measurements	93
3.10.6	Synthesis and the luminescence studies of Ce doped SrS nanostructures	94

3.10.7	Monitoring of radon and its progeny in the environment of vertical 15UD Pelletron accelerator facility	94
3.10.8	Comparative study of natural radioactivity levels in soil samples from the Upper Siwaliks and Punjab, India using Gamma Ray Spectrometry	95
3.10.9	Study of neutron induced modification on optical band gap of CR-39 polymeric detector	96
3.10.10	Neutron dosimetry with Linear Energy Transfer (LET) and the Proton Recoil Track counting Method	96
3.10.11	Characterization and synthesis of conducting polymers for radiation dosimetry	97
3.11	Civil Works	97
3.12	Compressed Air System and Material Handling Equipments	98
3.13	Data Support Laboratory	100
3.13.1	Fabrication of Octal Gate & Delay Generator	100
3.13.2	Design and development of FPGA based 8 channel 4K CAMAC ADC module	100
3.13.3	On-line data acquisition system for PKDILS set-up at IUAC	101
3.13.4	Fabrication of High Voltage Power supply control module for Atomic Physics set-up at IUAC	101
3.13.5	Fabrication of CAMAC Crate controller with Embedded PC for Magnet lab at IUAC	101
3.13.6	Development of Prototype Tesla meter Readout with CAMAC Interface	102
3.13.7	Servicing and Maintenance	102

4.	EXPERIMENTAL FACILITIES IN BEAM HALL	103
4.1	General Purpose Scattering Chamber	103
4.1.1	Large Neutron Array: an upcoming facility	104
4.1.2	Optimization of Flight Path in Neutron TOF Spectrometers	105
4.2	Gamma Spectroscopy Group	107
4.2.1	Indian National Gamma Array (INGA)	107
4.2.2	Servicing of Detectors	109
4.2.3	New Recoil Distance Device (Plunger) for INGA	109
4.2.4	Coulomb Excitation setup in GDA	110
4.3	Recoil Mass Spectrometers	110
4.3.1	Heavy Ion Reaction Analyzer (HIRA)	110
4.3.2	HYbrid Recoil mass Analyzer (HYRA)	112
4.4	Materials Science Facility	118
4.4.1	Fabrication of new sample ladder for irradiation chamber	119
4.4.2	Plasma based synthesis of thin films	120
4.4.3	Development of microwave CVD system	120
4.4.4	Ball milling system for synthesis of nanopowders	120
4.4.5	Scanning Probe Microscope	121
4.4.6	In-situ X-ray Diffractometer setup	121
4.5	Radiation Biology	121
4.5.1	Status of the Radiation Biology Beam line	121
4.5.2	Status of the Molecular Radiation Biology Laboratory	122

4.6	Atomic Physics	123
4.6.1	Status of the Atomic Physics Beam line	123
5.	RESEARCH ACTIVITIES	125
5.1	Nuclear Physics	125
5.1.1	High spin states in ^{137}Pm	125
5.1.2	Search for the role of proton and neutron orbits in Magnetic Rotation ($A = 137$ Nuclei)	128
5.1.3	High spin states in ^{107}In	131
5.1.4	Lifetime measurement in ^{75}Kr using Doppler shift attenuation method	132
5.1.5	High-Spin excitations in ^{99}Pd	134
5.1.6	High spin structure of ^{110}Ag and search for anti-magnetic rotation in ^{110}Cd	137
5.1.7	Spectroscopy of Magnetic Bands in and around $Z \sim 64$ and $N \sim 82$ Shell Closures	139
5.1.8	Investigation of High spin Structure of ^{112}In to Search for Multiple Chiral Bands	141
5.1.9	Investigation of Positive Parity Degenerate Dipole Bands in ^{133}Ce	144
5.1.10	Lifetime Measurements of Excited States of ^{124}Ba and ^{123}Cs Using DSAM Technique	146
5.1.11	Spectroscopy of $N \sim Z$, $A = 25-30$, Nuclei	148
5.1.12	Investigation of high spin states and isomer decay in doubly odd ^{208}Fr	150
5.1.13	Low-spin structure of ^{239}Np nucleus populated in incomplete fusion reaction	152

5.1.14	Shears band in near-spherical ^{138}Ce	153
5.1.15	Spectroscopy of fission fragments produced in $^{18}\text{O}+^{238}\text{U}$ reaction	155
5.1.16	Coulomb excitation of $^{112, 116}\text{Sn}$	158
5.1.17	Investigation of tetrahedral symmetry in nuclei	162
5.1.18	Measurement of fusion cross-section around the Coulomb barrier for $^{28}\text{Si} + ^{90,94}\text{Zr}$ systems	166
5.1.19	Evaporation residue measurements for $^{16}\text{O} + ^{194}\text{Pt}$ reaction using Hybrid Recoil mass Analyzer (HYRA)	169
5.1.20	Study of Entrance channel effects in $^{215}\text{Fr}^*$	172
5.1.21	Coincident detection of α particles and identification of reaction channels for $^6\text{Li} + ^{64}\text{Ni}$ at 26 MeV	175
5.1.22	Light particle emission in fusion reactions at high excitation energy and angular momentum	177
5.1.23	Studies using spherical shell model	178
5.2	Materials Science	181
5.2.1	Enhanced hydrogenation in SHI irradiated Pd-Pr layers	182
5.2.2	SHI Induced Effect on FeN/Si System	183
5.2.3	Swift heavy ion induced surface modifications of gold thin films	185
5.2.4	Role of melting temperature in intermixing of miscible metal/metal bilayers induced by swift heavy ions	186
5.2.5	Swift Heavy Ion Induced Modification in Bi/Te Bilayer System	188
5.2.6	Modifications of optical and microstructural properties of silver-fullerene C_{60} nanocomposite by swift heavy ions	189

5.2.7	Investigation of MOS capacitor embedding Au nanoparticles	191
5.2.8	Swift heavy ion modification of noble metal nanoparticles in fused silica glass prepared using low energy ion beam	192
5.2.9	Study of formation of Cu nanoparticle using Swift Heavy Ions	194
5.2.10	Surface patterning on Indium Phosphide with low energy bombardment : an evolution from nanodots to nanoripples	195
5.2.11	Formation of ion bombardment induced surface nanostructures on InP(100)	196
5.2.12	Synthesis of $\text{Si}_{1-x}\text{Ge}_x$ nanoparticles using atom beam sputtering and irradiation effects	197
5.2.13	Ion beam induced anisotropic deformation of Si chevrons	199
5.2.14	Effect of SHI irradiation on nano semiconductor: conducting polymer composite	201
5.2.15	Optical Properties of Irradiated ZnS Embedded in PMMA Matrix	202
5.2.16	Ion beam induced blistering and exfoliation studies in semiconductors	204
5.2.17	Room temperature ferromagnetism in Ni implanted nanodimensional ZnO films	205
5.2.18	Swift iron ion induced effects in gallium phosphide	206
5.2.19	Effects of Swift Heavy Ion on optical properties of AlGaN/GaN MQWs	208
5.2.20	SHI irradiation induced recrystallization of Ge implanted in Si	210
5.2.21	Band gap modification with Swift Heavy Ion Irradiation in MQWs	211

5.2.22 Nanoring formation and elongation of ZnS in SiO ₂ by 100 MeV Ni ion beam irradiation	212
5.2.23 Structural and optical investigations in low energy ion beam irradiated ZnO	213
5.2.24 Studies on high energy ion-irradiation in Silicon and GaAs	215
5.2.25 The Effect of Ion Beam on PVDF/Layered Silicate Nanocomposites	216
5.2.26 Low energy ion modification of metal/polymer composite films prepared by sputtering method	218
5.2.27 Dielectric Response of Makrofol–N PC Irradiated with 100 MeV Si ⁸⁺ Ions	219
5.2.28 PALS and DBS Studies of 50 MeV Li ³⁺ Ion Irradiated Polystyrene Films	220
5.2.29 Structural and mechanical properties of ion irradiated PMMA films	221
5.2.30 Effect of Li ⁺ ion irradiation on electrical characteristics of thin film polymers	223
5.2.31 Effect of Nitrogen Ion Implantation on the Structural and Optical Behavior of CR-39, Polycarbonate and Kapton Polymers	225
5.2.32 Statistical fluctuations in energy loss for swift heavy ions in thick polymeric absorbers	225
5.2.33 Study of Charge Response of Polyethylene Terephthalate (PET) Using 2.7 MeV/n ⁵⁶ Fe and 3.9 MeV/n ³² S ions	226
5.2.34 Synthesis and Characterization of Track Etched Membranes from Teflon-FEP Films by Swift Heavy Ions Induced Graft Copolymerization	227

5.2.35 Mechanism of charge transport in 100 MeV swift heavy ions (silver (Ag^{8+})) beam irradiated polypyrrole	228
5.2.36 SHI induced effect on metal dispersed polymer composites	229
5.2.37 Effect of SHI on magnetic properties of NiO nanoparticles doped PMMA composites	231
5.2.38 Effect of swift heavy ion irradiation on the optical and electrical characteristics of polypropylene/ TiO_2 Composite	232
5.2.39 Nanomaterial Filled SHI Induced Ion Tracks and their Application in Nanodevices	233
5.2.40 Magnetic Studies of SHI Irradiated Nanostructured Zinc Ferrite	235
5.2.41 Studies on the Effects of Swift Heavy Ion Irradiation on Nanostructured Titanates of Barium and Strontium in Photoelectrochemical Splitting of Water	236
5.2.42 SHI Induced Effects on the Multiferroic Behaviour of Bi-Substituted Co_2MnO_4 Thin Films	238
5.2.43 Swift heavy ions induced modifications in hydroxyapatite thin films	239
5.2.44 Li ion beam irradiation induced transformations in Liquid Crystalline Materials	241
5.2.45 Effect of 200 MeV Ag^{15+} Ion Irradiation on Multiferroic BiMn_2O_5	242
5.2.46 Densification induced crack formation in SHI irradiated NiO thin film	243
5.2.47 Effect of 150 MeV Ni^{11+} Ion Irradiation on Structural Properties of CuFe_2O_4 Ferrite Thin Films	244
5.2.48 Swift heavy ion irradiation induced phase transformation of CoFe_2O_4 thin films	245

5.2.49	SHI irradiation induced modification of BiFeO ₃ thin films prepared by sol-gel method	246
5.2.50	Ion beam induced crystallization of alumina coatings deposited by e-beam evaporation	248
5.2.51	Structure and dielectric study of Sr[(Mg _{0.32} Co _{0.02})Nb _{0.66}]O ₃ thin film	249
5.2.52	Influence of 120 MeV Ag ⁹⁺ ion Irradiation on the Structural and Photoelectrochemical Properties of Iron Oxide	250
5.2.53	The effect of 100 MeV Fluorine ion irradiation on interface trapped charge and oxide trapped charge of MOS devices	252
5.2.54	The effect of 50 MeV Li ³⁺ ion irradiation on generation-recombination centers in SiO ₂	253
5.2.55	Effects of 50Mev Li ³⁺ ion irradiation on 200 GHz SiGe Heterojunction Bipolar Transistors	254
5.2.56	Li Ion Induced Effects on Electrical and Defect Characteristics of npn Bipolar Power Transistors	256
5.3	Status of Radiation Biology Research using Heavy Ions	259
5.3.1	Studies on heavy ion irradiated metal induced radiation sensitization in Bacillus subtilis	259
5.3.2	Role of PARP in repair after DNA damage by carbon ion beam in Human Cervical Epithelial Carcinoma (HeLa) cells	262
5.3.3	Activation of crucial signaling components involved in DNA damage sensing, repair, cell cycle arrest and apoptosis following carbon irradiation of A549 cells.	263
5.4	Atomic Physics Research	267

5.4.1	Atomic Physics Experiments with Interest in Interdisciplinary Science	267
5.4.2	Multiple ionization of SF ₆ and its dependence on projectile charge	268
6.	ACADEMIC ACTIVITIES	269
6.1	Pelletron Beam Utilization by Users	269
6.1.1	Pelletron Beam Time Utilization and Experiments performed (April 2008 - March 2009)	269
6.1.2	List of Users Family	270
6.2	M. Sc. Orientation programme	275
6.3	Library	276
6.4	The PhD Teaching Programme	277
6.5	Academic Activities held in 2008-09	277
6.6	Forthcoming Events: 2009	278
6.7	List of Seminars Conducted in the Year 2008-09	279
6.8	List of Publications (2008-2009)	281
6.9	List of Technical Reports / Technical Memos (2008-09)	294
6.10	Teaching Lab Activities	297
	Appendix – I — Committees	298
	Appendix – II — IUAC Personnel	305
	Appendix - III — List of Users	308
