

CONTENTS

S.No.	Chapter Particulars	Page No.
1.	ACCELERATOR	1
1.1	PELLETRON	1
1.1.1	Operational Summary	1
1.1.2	Maintenance and Development Activities	3
1.1.3	Ion Source Activities	8
1.1.4	Beam Pulsing System	8
1.1.5	Development Activities	9
1.2	LOW ENERGY ION BEAM FACILITY (LEIBF)	10
1.2.1	Operation	10
1.2.2	Maintenance	12
1.2.3	Development	13
1.3	PARAS	13
1.3.1	Operation	13
1.3.2	Maintenance	14
1.3.2.1	Ion Source Maintenance	14
1.3.2.2	RBS facility maintenance	14
1.3.3	Development	14
1.3.3.1	Installation of an electron suppressor	14
1.4	DEVELOPMENT OF 50 KEV ION ACCELERATOR	15
2.	ACCELERATOR AUGMENTATION PROGRAM	17
2.1	LINAC	17
2.1.1	Status report and improvements carried out in operational Superconducting (SC) Linac	17
2.1.2	New developments associated with superconducting linac	18
2.1.3	Superconducting Niobium Resonators	19

2.1.3.1	Low Beta Resonator	19
2.1.3.2	Single Spoke Resonators	20
2.1.3.3	650 MHz, $\beta=0.9$ Cavity	21
2.1.3.4	Upgradation	22
2.2	HIGH TEMPERATURE SUPERCONDUCTING ECRIS -PKDELIS AND LOW ENERGY BEAM TRANSPORT (LEBT)	22
2.2.1		22
2.2.2	Radio frequency quadrupole accelerator	31
2.2.3	Drift tube linac resonator	32
2.2.4	Beam transport system for HCI	33
2.2.4.1	Beam optics of high current injector	33
2.2.4.2	Fabrication of magnetic quadrupoles for LEBT section of HCI	35
2.2.4.3	Fabrication of fast Faraday cup for HCI	35
2.3	CRYOGENICS AND APPLIED SUPERCONDUCTIVITY LAB	36
2.3.1	Cryogenics for superconducting LINAC	36
2.3.2	Superconducting quadrupole magnet for HYRA	37
2.3.3	Development of a table top LN ₂ plant	38
2.3.4	VTI for indigenously developed cryo-free superconducting solenoid magnet	38
2.4	ELECTRONICS FOR CRYOGENICS: LAB ACTIVITIES	39
3.	RESEARCH SUPPORT FACILITIES	42
3.1	SUPPORT LABORATORIES	42
3.1.1	High Vacuum Laboratory	42
3.1.1.1	Modifications in the Low Energy Ion Beam Facility	42
3.1.1.2	Installation of Negative Ion Implanter Facility	43
3.1.1.3	High Current Injector Installation	44
3.1.1.4	Maintenance Activities	45
3.1.2	Beam Transport System	45
3.1.2.1	Power Supply for HCI Steerer and low power Quadrupole Magnets	45

3.1.2.2	Development of Multi Harmonic Buncher (MHB) Control Electronics	45
3.1.2.3	Feedback Controller for Piezoelectric actuator based Phase locking of SCQWR	46
3.1.2.4	Development of 20 kW, 97 MHz. RF amplifier by combining two 10 kW amplifiers	46
3.1.2.5	Development of 97 MHz, 10 kW vacuum tube based RF amplifier cavity	46
3.1.2.6	Beam Transport System Maintenance	47
3.1.2.6.1	Scheduled Preventive Maintenance	47
3.1.2.6.2	Breakdown Maintenance	47
3.1.3	Detector Laboratory	47
3.1.3.1	Detector system for Quasi-elastic scattering/ fission angular distribution studies in GPSC/NAND	48
3.1.3.2	Detector system for charge particle multiplicities in fission experiments	48
3.1.3.3	MWPC in GPSC	48
3.1.3.4	Annular PPAC for Coulex	49
3.1.3.5	Strip detector set up in GPSC	49
3.1.3.6	Instrumentation	49
3.1.4	Target Development Laboratory	49
3.1.5	RF & Electronics laboratory	52
3.1.5.1	Front end and PSD electronics for NAND array at IUAC	52
3.1.5.2	20 kilowatts VHF amplifier for DTL at IUAC	52
3.1.5.3	Two kilowatts Solid state VHF amplifier module for DTL at IUAC	53
3.1.5.4	Negative Ion Implanter...Control System	53
3.1.5.5	VMEbus server for LINAC Module	53
3.1.5.6	64-channel optically coupled digital I/O VME board for control system	54
3.1.5.7	Development of the Multi-harmonic buncher (MHB) for High Current Injector (HCI)	54
3.1.5.8	Web based monitoring of the Accelerator control scheme	54

3.1.6	Computer and Communications	55
3.1.6.1	High Performance Computing Facility	55
3.1.6.2	IUAC LAN and servers	55
3.1.6.3	Enterprise Resource Planner	56
3.1.7	Health Physics Laboratory	56
3.1.7.1	Characterization and luminescence studies of Eu doped Barite nanophosphor	56
3.1.7.2	Thermoluminescence response of gamma irradiated SrAl ₂ O ₄ :Eu ²⁺ /Dy ³⁺ nanophosphor	57
3.1.7.3	TL response of nanocrystalline MgB ₄ O ₇ :Dy irradiated by 3 MeV proton beam, 50 MeV Li ³ and 120 MeV Ag ⁹ ion beams	57
3.1.7.4	Thermo-luminescence kinetic parameters of γ -irradiated Sr ₄ Al ₁₄ O ₂₅ :Eu ²⁺ , Dy ³⁺ phosphors	58
3.1.7.5	Swift heavy ion induced structural and luminescence characterization of Y ₂ O ₃ : Eu ³⁺ phosphor: A comparative study	58
3.1.7.6	Effect of gamma irradiation on opto-structural, dielectric, and thermoluminescence properties of natural phlogopite mica	59
3.1.7.7	Photoluminescence and thermoluminescence study of KCaSO ₄ Cl doped with Dy and Ce synthesized by acid distillation method	59
3.1.8	Data Support Laboratory	59
3.1.8.1	On-line Data Acquisition Systems upgrade in Data Room	60
3.1.8.2	Trigger Logic implementation using V1495 module for VME Data Acquisition system	60
3.1.8.3	Development of NIM modules for NAND experimental facility	60
3.2	UTILITY SYSTEMS	61
3.2.1	Electrical Group Activities	61
3.2.1.1	Maintenance of Electrical Installations of Substation, Office Blocks and Residential Colony	62
3.2.1.2	Captive Power Installations	62
3.2.1.3	Voltage Stabilisers	62
3.2.1.4	UPS Installations	62
3.2.1.5	Power Factor Compensation	62
3.2.1.6	Communication Equipments:	63

3.2.1.7	Energy Saving	63
3.2.1.8	UPS Systems for 15UD Pelletron & LHe Plant	63
3.2.1.9	Power DG Backup to 15UD Pelletron, LHE Plant & HPC Centre	63
3.2.10	Electrical Energy Management Network	63
3.2.11	Electrical Earthing:	63
3.2.12	Works for Beam Hall-III:	63
3.2.13	Works For Graphitisation Laboratory (14 C):	64
3.2.2	Air Conditioning, Water System and Cooling Equipments	64
3.2.3	Mechanical Workshop (MG-III)	66
3.2.4	Civil Works	67
3.2.5	Compressed Air System And Material Handling Equipments (MG-I)	68
4.	EXPERIMENTAL FACILITIES IN BEAM HALL	69
4.1	NEUTRON DETECTOR ARRAY FACILITY	69
4.1.1	Characterization of liquid scintillators for NAND facility	69
4.1.2	Design, fabrication and testing of fast neutron shielding blocks for NAND	70
4.1.3	Beam test of NAND facility	70
4.2	GAMMA DETECTOR ARRAY	71
4.2.1	Upgradation of GDA setup	71
4.2.2	Plunger Device for INGA	72
4.2.3	Plunger set-up in GDA	72
4.2.4	Repair of Clover and HPGe detectors	73
4.2.5	Setup for study of nuclei through Coulomb excitation in GDA	73
4.2.6.	Augmentation of BGO multiplicity filter array	74
4.2.7	Test of CSI(Tl) detector	74
4.2.8	Recent experiments carried out in GDA	75
4.3	RECOIL MASS SPECTROMETERS (HIRA AND HYRA)	75
4.4	MATERIALS SCIENCE FACILITY	76

4.4.1	Irradiation chamber maintenance	77
4.4.2	Scanning Probe Microscope	77
4.4.3	Field emission scanning electron microscope (FE-SEM)	78
4.4.4	In-situ X-ray Diffractometer	78
4.4.4.1	Up-gradation and maintenance in the facility	79
4.4.4.2	Modification in beam line between XRD chamber and high vacuum chamber	79
4.4.5	In-situ high temperature irradiation facility	79
4.4.6	Spectroscopy facilities and in situ testing of micro-Raman facility in beam hall with preliminary results	80
4.4.7	Facilities for electrical characterization of materials	80
4.4.7.1	Facilities for synthesis of samples	81
4.4.7.2	An experimental setup for the measurement of magnetic AC-susceptibility from 10 K-325 K	81
4.4.7.3	An experimental setup for the simultaneous measurement of thermoelectric power of two samples from 77 K - 500 K	83
4.4.8	Plasma based systems for thin film deposition.	83
4.4.9	Contact angle setup	85
4.5	RADIATION BIOLOGY EXPERIMENTAL FACILITY	85
4.6	ATOMIC PHYSICS FACILITY	86
4.6.1	Progress of the Collisional spectroscopy in VUV-visible region	86
4.6.2	A Setup for Experiment in the Cross-link of Atomic and Nuclear Physics	87
4.7	ACCELERATOR MASS SPECTROMETRY	89
4.7.1	Enhancing BeO- beam current by co precipitating Nb with BeO:	89
4.7.2	¹⁴ C AMS facility	90
5	RESEARCH ACTIVITIES	92
5.1	NUCLEAR PHYSICS	92
5.1.1	Evaporation residue cross-section measurements for ¹⁶ O + ⁶⁴ Zn and ³² S + ⁴⁸ Ti reactions	92
5.1.2	Spin gated giant dipole resonance widths in ¹⁴⁴ Sm	94

5.1.3	Study of fusion-fission dynamics in ^{19}F induced reactions	96
5.1.4	Fission fragment mass distributions for $^{16}\text{O} + ^{184}\text{W}$	97
5.1.5	Fission Dynamics study in ^{243}Am and ^{254}Fm	98
5.1.6	The study of $^{12}\text{C}(\alpha,\gamma)$ astrophysical reaction using $^{12}\text{C}(^6\text{Li},d)$ and $^{12}\text{C}(^7\text{Li},t)$ reaction at 20 MeV	99
5.1.7	Lifetime measurements in ^{175}Re	100
5.1.8	RDM Plunger facility test with Clover detectors	101
5.1.9	High spin spectroscopy in ^{105}Cd	102
5.1.10	Study of shears mechanism at low deformation in ^{105}In	104
5.1.11	Chirality in nuclei	105
5.1.12	In-beam γ -ray spectroscopy of ^{127}I	107
5.2	MATERIALS SCIENCE	109
5.2.1	Softening and Stiffening of Phonons in Rutile Titanium Dioxide Film by Energetic Ion Irradiation	109
5.2.2	A Study on Dependence of Radiation Stability of $\text{Gd}_2\text{Zr}_2\text{O}_7$ on Stoichiometry	110
5.2.3	Evolution of Defect States at $\text{ZnS}:\text{TiO}_2/\text{N-Si}$ Heterojunction Interface Under High Energy Radiation	112
5.2.4	Synthesis of Nickel Nanostructures by Au^{9+} and Ni^{9+} Swift Heavy Ion Irradiation	113
5.2.5	Radiation Stability of Graphene Under 150 MeV Au Ion Irradiation	114
5.2.6	Volume Expansion in Crystalline and Amorphous Germanium by Swift Heavy Ion Irradiation	115
5.2.7	Swift Heavy Ion Induced Effect on Bimetallic Au/Fe Nanoparticles Dispersed in Silica Matrix	116
5.2.8	Interfacial Mixing in Co/Sb Thin Film System	117
5.2.9	140 MeV Ni Ion Irradiation Induced Structural Modifications of AgInSe_2	118
5.2.10	Tailoring Topographical and Magnetic Properties of Fe-Ni Alloy Based Thin Films Employing 100 MeV Ag^{8+} IONS	118
5.2.11	Studies of Ion Beam Induced Crystallization on Metal Oxide Thin Films	119
5.2.12	Dielectric Response of $\text{Pmma}/\text{ZnFe}_2\text{O}_4$ Composites Under 400 keV Ar^{+2} Ions	120

5.2.13	Low Energy Bombardment Induced Formation of Ge Nanopatterns	122
5.2.14	Synthesis of Embedded Au Nanostructures by Ion Irradiation of Au Thin Film on Glass	123
5.3	RADIATION BIOLOGY RESEARCH	125
5.3.1	Molecular action of Moringa oleifera leaf extract and its active components on radiation protection: Assessment of low and high LET radiation effectivity.	125
5.3.2	Targeting EGFR in A549 cells by antiEGFR antibody conjugated Au nanoparticles to achieve higher cell killing on exposure to high LET radiation	127
5.4	ATOMIC & MOLECULAR PHYSICS RESEARCH	129
5.4.1	Study of Ion-Induced Dissociation of Water Molecule	129
5.4.2	Plasmon excitation in intermediate velocity proton collision with naphthalene	129
5.4.3	An unusual Electron Capture Phenomena by Bare Ions produced in Nuclear Reactions	130
5.5	ACCELERATOR MASS SPECTROMETRY RESEARCH	133
5.5.1	Distribution of atmospheric ^{10}Be in the surface sediments of Sambhar Lake, Rajasthan	133
5.5.2	Burial dating of artifact samples from Tikoda, Madhya Pradesh using Accelerator Mass Spectrometer (AMS)	134
5.5.3	An environmental magnetic study & elemental composition of a marine sediment core from the central western Bay of Bengal: implications for paleo-oceanographic studies	135
5.5.4	^{10}Be in the Sediments from the Krossfjorden and Kongfjorden Fjord System, Svalbard, Arctic Ocean: Paleoclimatic implications	136
6.	ACADEMIC ACTIVITIES	138
6.1	PELLETRON BEAM UTILIZATION BY USERS	138
6.1.1	Pelletron Beam Time Utilization and Experiments performed (April, 2013 to March, 2014)	138
6.1.2	List of Users Family	139

6.2	STUDENT'S PROGRAMME	146
6.2.1	Summer Project for B.Sc. (Physics) Students	146
6.2.2	M. Sc. Orientation Programme	148
6.2.3	PhD Teaching Programme	149
6.2.4	Teaching Laboratory Activities	149
6.3	LIBRARY	150
6.4	ACADEMIC ACTIVITIES HELD IN 2013-14	150
6.5	FORTHCOMING EVENTS: 2014	151
6.6	LIST OF PH.D AWARDEES	152
6.7	LIST OF PUBLICATIONS IN THE YEAR 2013-14	152
6.8	LIST OF SEMINARS CONDUCTED IN THE YEAR 2013-14	160
6.9	LIST OF TECHNICAL REPORTS /MEMOS (2013-14)	162
APPENDIX I		164
APPENDIX II		169
APPENDIX III		171
